and F1

1. **(Five Times Amended)** A server system facilitating one or more object management tasks, of a server, associated with one or more non-markup language objects, the system comprising:
 - a server;
 - one or more databases, in communication with the server, comprising one or more non-markup language objects; and
 - a workflow module that facilitates one or more object management tasks of the server, associated with the one or more non-markup language objects according to one or more predefined calendaring and scheduling functions, wherein the workflow process
